Summary

I'm a 29-year-old man from Turku. I have studied biochemistry at the University of Turku and got formal education in the field of Computer Science through open university courses. I work very well as part of a team and enjoy solving challenges.

Education

- 3 years of biochemistry
- Open course load in open university of Turku:
  - Programming basics
  - Software engineering
  - Web development
  - Distributed software systems and cloud services
  - Capstone project - the project is in the Links-section
- Aws/reStart program - AWS Certified Cloud Practitioner certification

Programming and IT skills

I have programmed for a couple of years now and also acquired some formal education in the field from university. I'm most familiar with JavaScript, which is visible in my projects on GitHub, but I am also familiar with Java and the basics of C++. From the projects I've completed in the open university courses, I've gotten proficient with React, HTML, CSS, and Spring.io.

My skills are mainly in web development, but I am very eager to broaden my skills in any direction. In my spare time, systems programming will be one of my next challenges to learn.

In 2023, I completed the AWS/reStart training program, where I got familiar with AWS services such as EC2, S3, Lambda, and managed services. The training program ended with an exam in these services and the AWS Certified Cloud Practitioner certificate for successfully completing it.

Work experience

- 6/2018 onwards - Deliverer, Lounais-Suomen Tietojakelu
